PROFESSIONAL SUMMARY

Senior DevOps Engineer with 4+ years of experience building, securing, and operating Red Hat OpenShift and Kubernetes platforms for enterprise banking and engineering environments. Specialized in multi-cluster governance with OpenShift ACM and ACS, GitOps delivery with ArgoCD and Helm, CI/CD pipeline engineering, and enterprise workload automation with Control-M. Red Hat Certified Engineer in OpenShift, with specialist certifications in Advanced Cluster Management, Advanced Cluster Security, and containers. Proven track record of zero-downtime releases and reducing manual operational overhead through automation. Actively extending platform expertise into hosting AI/LLM workloads on Kubernetes through personal projects.

WORK EXPERIENCE

Senior DevOps Engineer **September 2025 – Present**
eMcREY Limited Riyadh, Saudi Arabia · On-site

- **Workload Automation:** Designed multi-stage Control-M deployment workflows for staging environments with human approval gates, file-watcher triggers, and per-order condition isolation to support concurrent deployments safely.
- **Reliability Engineering:** Diagnosed and resolved race conditions, stale conditions, and self-ordering loops in Control-M job flows; fixed SELinux context and agent host misconfigurations during proof-of-concept rollout.
- **Release Tooling:** Developed Bash tooling for deployment payload extraction and approve/deny handling, integrated into automated release workflows across segregated file-transfer zones.
- **Container Enablement:** Debugged and optimized developer container images for Red Hat OpenShift deployment, improving build reliability and deployment speed.

Platform Engineer **March 2024 – August 2025**
IBM Solutions Delivery, Inc. Quezon City, Philippines · Hybrid

- **Multi-Cluster Governance:** Deployed OpenShift Advanced Cluster Management (ACM) and Advanced Cluster Security (ACS) to establish centralized policy enforcement, RBAC governance, and security posture management across multiple clusters.
- **Policy Automation:** Authored ACM governance policies in YAML to detect anomalous resource usage and trigger automated lifecycle management of temporary namespaces, reducing manual ops overhead.
- **Operational Auditing:** Developed Python and Bash scripts to cross-audit microservice versions between PROD and DR environments, improving release verification accuracy and reducing audit cycle time.

DevOps Engineer **June 2022 – March 2024**
IBM Solutions Delivery, Inc. Quezon City, Philippines · Remote

- **Banking Sector Delivery:** Managed Helm chart deployments and GitOps workflows for large-scale banking clients and external vendors, ensuring zero-downtime releases.
- **Pipeline Engineering:** Built Jenkins declarative pipelines to automate pull request validation, code quality checks, and build-time analytics.
- **Stakeholder Enablement:** Delivered technical training and production support to 300+ project managers, developers, and architects across multiple delivery teams.

CERTIFICATIONS

Red Hat Certified Engineer in OpenShift	Oct 2026 – Oct 2029
Red Hat Certified Advanced System Administrator in OpenShift	Oct 2026 – Oct 2029
Red Hat Certified OpenShift Administrator (EX280)	Nov 2025 – Nov 2028
Red Hat Certified Specialist in OpenShift Advanced Cluster Security (EX430)	Jul 2026 – Jul 2029
Red Hat Certified Specialist in OpenShift Advanced Cluster Management (EX432)	Dec 2025 – Dec 2028
Red Hat Certified Technologist in OpenShift (EX180)	Mar 2026 – Mar 2029
Red Hat Certified Specialist in Containers (EX188)	Mar 2025 – Mar 2028
AWS Certified Cloud Practitioner	Feb 2026 – Feb 2029
Red Hat Certified Specialist in OpenShift Automation and Integration (EX380)	Oct 2026 – Oct 2029

Also: Red Hat Technical Seller – Container Management, Mission Critical Automation, Application Platform (Mar 2026) · Microsoft Azure Fundamentals & Azure AI Fundamentals (Dec 2022)

TECHNICAL SKILLS

Container Platforms: Red Hat OpenShift, Kubernetes, k3s, Docker, Podman

Cluster Management & Security: OpenShift ACM, OpenShift ACS, multi-cluster governance, RBAC, namespace lifecycle, DevSecOps

CI/CD & GitOps: ArgoCD, Helm, Jenkins, GitLab CI/CD, GitHub Actions

Automation & IaC: Control-M, Ansible Automation Platform, Terraform

Linux & Networking: RHEL, Ubuntu, SELinux, ingress-nginx, Tailscale, Hyper-V

Observability: Loki, Alertmanager, webhook-based alerting

Languages: Python, Bash/Shell, Java

Cloud: AWS (certified), Microsoft Azure

AI / LLM (personal projects): Anthropic Claude API, OpenAI API, LangChain, RAG, ChromaDB

PERSONAL PROJECTS

GitOps Kubernetes Homelab — github.com/jeboygwapo/homelab
Three-node k3s cluster on Hyper-V managed entirely through GitOps: ArgoCD with self-heal syncing from a private Git repo, ingress-nginx host-based routing, Tailscale-only private access, and Helm-managed PostgreSQL-backed services. Roadmap: Prometheus/Grafana, Longhorn storage, and cert-manager TLS.

K8s Log Analyzer — AI Incident Triage on Kubernetes — github.com/jeboygwapo/k8s-log-analyzer
Kubernetes-deployed incident triage service that ingests logs from Loki, receives Alertmanager webhooks, and suggests fixes using retrieval over a runbook knowledge base (CrashLoopBackOff, OOMKilled, ImagePullBackOff). Built with FastAPI, LangChain, ChromaDB, and the Anthropic Claude API; shipped with a Helm chart, Kubernetes manifests, and a test suite.

Debt Tracker — github.com/jeboygwapo/debt-tracker
Full-stack personal finance web app with debt payoff strategies and remittance tracking. Built with FastAPI, SQLAlchemy, and PostgreSQL; containerized with Docker and delivered through a GitHub Actions CI/CD pipeline.

EDUCATION & TRAINING

Bachelor of Science in Information Technology **2022**
University of the East, Manila

Ongoing: PM713 Project Management (Stellenbosch University, Faculty of Engineering) · AI Engineering coursework (LLM Engineering, Agentic AI) · 100 Days of Code (Python)
